Dear Ms. Stanton:

I am writing to you today in support of protecting our water and our lands from the impacts of uranium mining and to ensure that the public is heard on issues of mine prospecting.

The final rules for House Bill 08-1161 and Senate Bill 08-228 should adhere to the following principles:

- * Uranium companies should be held accountable for cleaning up their mess and returning groundwater quality to its original state that existed before any mining or mine prospecting took place.
- * All uranium companies should play by the rules as a ?designated mining operation? and submit environmental plans to minimize the impacts of toxic uranium pollution on our land, water and communities.
- * The public, local governments, and other stakeholders must be notified about mine prospecting activities and have the right to submit comments on proposed prospecting permits.
- * The public and stakeholders should have the ability to appeal mine prospecting permit decisions to ensure that the environment and public health are protected in those decisions.

Very sincerely,

Kelly Deligio

I am writing to you today in support of protecting our water and our lands from the impacts of uranium mining and to ensure that the public is heard on issues of mine prospecting.

The final rules for House Bill 08-1161 and Senate Bill 08-228 should adhere to the following principles:

- * Uranium companies should be held accountable for cleaning up their mess and returning groundwater quality to its original state that existed before any mining or mine prospecting took place.
- * All uranium companies should play by the rules as a "designated mining operation" and submit environmental plans to minimize the impacts of toxic uranium pollution on our land, water and communities.
- * The public, local governments, and other stakeholders must be notified about mine prospecting activities and have the right to submit comments on proposed prospecting permits.
- * The public and stakeholders should have the ability to appeal mine prospecting permit decisions to ensure that the environment and public health are protected in those decisions.

Very sincerely,

Caroline Smith
